Project: 2928 IAQ A

Test Report: Fiber Count by Phase Contrast Microscopy (PCM) consistent with IRSST Method 243-1

| Sample | Location | Sample Date | Volume (L) | Fibers | Fields | LOD (fib/cc) | Fibers/mm ² | Fibers/cc | Notes |
|--------|--------------|-------------|------------|--------|--------|-----------------|------------------------|-----------|-------|
| 1 | Kitchen Area | 10/25/2022 | 1200 | 10 | 100 | 0.0022 | 12.7 | 0.0041 | |
| -0001 | | | | | | | | | |

This method requires the submission of field blanks with each sample set. No discernable field blanks were submitted, samples are not blank corrected.

Analyst(s):

Natalie D'Amico PCM IRSST 1

Matthew Davis or other Approved Signatory

Limit of detection is 7 fibers/mm². Intra-laboratory Sr values: 5-20 fibers = 0.35, 21-50 fibers = 0.30, 51-100 fibers = 0.20. The laboratory is not responsible for data reported in fibers/cc, which is dependent on volume collected by non-laboratory personnel. Results have been blank corrected as applicable. EMSL maintains liability limited to cost of analysis. This report relates only to the samples reported above and may not be reproduced, except in full, without written approval by EMSL. EMSL bears not responsibility for sample collection activities or analytical method limitations. Interpretation and use of test results are the responsibility of the client. Samples received in good condition unless otherwise noted.
